Julie Merchant, BIOL
“Optogenetic acidification of synaptic vesicles in C. elegans”

Laura Bashor, BIOL:
“Lyme disease and elevation: a dynamic relationship”

Mack B. Hale, MBBC:
“Investigating the Sensation of Electric Shock in Drosophila melanogaster: Potential Pathways for a Widely-Used but Uncharacterized Stimulus”

Cassidy Campbell Mueller, MBBC:
“Characterizing the SloR:SRE interaction in Streptococcus mutans through in vitro DNA binding studies”

Skylar Nahi, MBBC:
“Protein Binding in an in vivo Model: Identifying Streptococcus mutans SloR binding partners in a Bacterial Adenylate Cyclase Two Hybrid System”

Patrick Monette, MBBC:
“Investigating the independent sloR promoter in Streptococcus mutans”

Eliza C.B. Jaeger, NSCI:
“Examining the Effects of Testosterone Replacement on Spatial Memory in Aged Rats using a Radial Arm Maze Task”

Emily Cailin Goins, NSCI:
“Examining the Effects of Testosterone Replacement on Spatial Memory in Aged Rats using an Object-Location Memory Task”

Gregory Pil, NSCI:
“Characterization of a novel mediator of nociception in adult Drosophila melanogaster”

May 8-15, 2017 | 12:30 p.m. | MBH 220
Lunch available at 12:15 p.m.
