Hello new students,

We just sent you an email letting you know that our records indicate that you either have not completed your health forms, or that there is incomplete information on your health forms. As a result, you are not allowed to move into your residence hall until you visit the Parton Health Center on move in day.

If you do not complete and successfully upload your forms by January 23 – this may slow down your move-in day. Move-in day can be long and tiring and so we strongly advise you to work on completing and successfully uploading your forms as soon as possible. Additionally, if you do not complete and successfully upload forms before January 23, there could be additional consequences. Please read on for details.

Vermont State Law requires certain immunizations are complete to come to college here. If you arrive to Middlebury campus without the required immunizations here are further potential

- Parton Health Center is unable to provide those immunizations for you throughout the spring semester. You will have to obtain immunizations off-campus, and when you visit Parton on move-in day, they will provide you with information for how to do so.
- Missing immunizations will result in consequences. Please read these consequences below.
  - Until a satisfactory plan is made with Parton for achieving immunization compliance you will not be able to participate in the spring add/drop period. This is the period after class registration, where students can change their class schedule. Many students find this period critical in developing a manageable course load, and is often how students navigate getting into the classes they really want to take.
  - If you remain without proper immunizations after the add/drop period, you will not being able to register for fall classes.
  - If you remain without proper immunizations after registration for fall class registration, you will not be allowed to participate in room draw for fall housing assignments – and will not have a room on-campus until you become compliant.

As you can see by these consequences, we take immunization very seriously. If you need help navigating this process, the Parton Health Staff is here to help and you can call them at 802-443-3290 or see the steps to completing the health forms at go.middlebury.edu/healthforms.
