

**Research Coordinator, WELL Center/Department of Psychology
Drexel University, Philadelphia, PA**

Applicants are being sought for one research coordinator position in the [WELL Center](#), Department of Psychology at Drexel University in Philadelphia, PA, under the direction of Meghan Butryn, Ph.D. Dr. Butryn is conducting multiple NIH-funded clinical trials in the areas of physical activity promotion, obesity treatment, and technology-aided behavior change. This coordinator's particular focus will be on a clinical trial for obesity prevention in young adults.

Coordinator responsibilities will include: scheduling and conducting participants' clinical research assessments; managing data and coordinating data collection; maintaining contact and approvals with NIH and IRB; and supervising part-time research assistants. Opportunities also will be available, as desired, for additional data analysis and preparation of poster presentations and/or manuscripts related to the projects. Coordinators also have the opportunity to be exposed to and involved in various clinical interventions and treatments.

Candidates should have a bachelor's degree, coursework, and/or work experience related to clinical research. This position is excellent preparation for individuals who wish to pursue graduate study in clinical psychology or a related area. Ideally, candidates will be available to begin full-time work in the fall of 2018, though a delayed start date could be considered for an exceptional candidate.

To apply, please complete the application [here](#), upload your CV and a cover letter, and submit using the >> button.
