

# Middlebury

As of July 1, 2016, there is a Vermont state requirement for immunization compliance for all residential college students. The following is the current status of Middlebury College students' immunizations. Achieving 100% compliance is unlikely due to a small number of students with allowable medical and/or religious exemptions. Students who are not immunized for medical or religious reasons may need to leave campus in the event of a communicable disease outbreak.

## Immunization Rates

	Hepatitis B	Measles, Mumps, Rubella	Meningitis	Tetanus, Diphtheria, Pertussis	Varicella
<b>Fully Immunized</b>	<b>99.4%</b>	<b>99.5%</b>	<b>99.2%</b>	<b>99.3%</b>	<b>99.3%</b>
