# STUDENT WORK HIGHLIGHT

# BEHIND THE SCENES

Student projects are underway for Spring 2024! Earlier this month, students constructed a car rig called a Poor Man's Process, a way of faking driving by moving lights around the car and shaking it to imply real driving conditions. This was also mixed with rear projection, a classic Hollywood technique where a POV driving video of a road is played on a screen behind the rearview window to fake movement.

If you have work you're doing that you would like to highlight in the FMMC newsletter or Instagram, please email [ambryant@middlebury.edu](mailto:ambryant@middlebury.edu) with images or videos and a short description of the project or process!
