

## Faculty Open Access Waiver

Dear [Faculty Name],

Pursuant to the Open Access Policy adopted by the faculty on May 17, 2016, this communication serves to notify you that your request for a waiver of the Open Access license for [Article Title] in [*Serial Title*] has been granted. This waiver may not be revoked by Middlebury, and Middlebury will have no license under the policy unless you choose to relinquish the waiver.

Independent of the waiver, we recommend that you deposit your article in Middlebury's Open Access repository as specified in the Middlebury College Open Access Policy. You can do so regardless of the waiver status of the article or any agreement that you may have signed with a publisher. The simplest method for depositing your article is to submit the accepted author manuscript (the language approved by peer review) via the [online submission form](#).

In cases where you receive a waiver of the Open Access policy, the publisher's agreement may provide sufficient rights to allow copies of your article to be made publicly available in the Middlebury repository. The publisher may ask that certain conditions be met, some of which the repository can easily accommodate (for example, an embargo period during which the article will not be made publicly available).

Even if you conclude that your article cannot be made publicly available, depositing a copy of your article in the repository is useful for archival and indexing purposes. The bibliographic information may be made available for harvesting and indexing by search engines, such as Google Scholar, creating increased awareness of your article.

If you have any questions about the waiver of this policy or depositing in the Middlebury repository, please visit the [Open Access](#) page.

Important note for NIH-funded authors: Even though you are being granted a waiver of the application of the Open Access policy to your article specified above, if that article is subject to the NIH Public Access Policy because it is a peer-reviewed manuscript that arose, in whole or in part, from NIH-funded research and was accepted for publication on or after April 7, 2008, your obligations under the NIH policy cannot be waived. You must be sure to reserve rights sufficient to comply with the NIH policy when you enter into a publication agreement for the article.
